

MyplanMybudget Product & UX Specification

Version: 0.2

Updated: 2026-02-20

Role: PDF1-PRODUCT

1. Product Vision

MyplanMybudget is a click-first budgeting web app for users who want fast planning and safe, predictable money workflows.

Core promises:

- Simple: guided setup with templates and fast forms.
- Visual: dashboard charts for cashflow and trend review.
- Safe-feeling: explicit export controls and destructive-action confirmation.
- Sandbox-first: scenario simulation before applying changes.

Non-goals for this version:

- Bank account linking.
- Investment/trading workflows.
- Double-entry accounting complexity.

2. Target Users

- Starter Saver: wants a guided first budget.
- Busy Worker: needs quick capture and clear monthly summary.
- Planner Nerd: wants simulation controls and comparison-ready outputs.

3. Information Architecture

Primary navigation:

- Dashboard
- Budgets
- Transactions
- Simulations
- Notes
- Settings

Global actions:

- Add expense
- Add income
- Add note
- New simulation
- Export

4. Core User Flows

Auth:

- Email/password signup and login.
- Signed cookie session.

Onboarding wizard:

- Step 1: currency and cycle start.
- Step 2: template selection.

- Step 3: categories and optional goal.

Daily capture:

- Add expense with amount, category, memo, date.
- Optional recurring rule creation.

Monthly review:

- End-of-month review CTA from dashboard.

Simulation flow:

- Start from baseline income/expense.
- Tune sliders for assumptions.
- Save/compare/apply with explicit confirmation.

5. Screen Inventory Status

Implemented now:

- Auth page with login/signup tabs.
- Onboarding wizard.
- Dashboard with dynamic cards, trend chart, recent activity.
- Budgets with editable category limits and progress bars.
- Transactions with add form, filters UI, recent log.
- Simulation sandbox with sliders and line chart.
- Notes and reminders board.
- Settings with re-auth gate and export links.

6. Security and Trust Rules

- Protected routes via middleware.
- Server-side auth checks for data reads/writes.
- Re-auth requirement for export APIs.
- Explicit danger zone actions in settings.

7. Accessibility and UX Rules

- Keyboard-accessible forms and controls.
- Primary action visible on every key page.
- Empty states prompt immediate next action.
- Post-save hints guide the next step.

8. Design Tokens (Current)

- Primary: #111827
- Accent: #2563eb
- Success: #16a34a
- Warning: #f59e0b
- Danger: #dc2626
- Radius: 2xl
- Spacing scale: 8 / 12 / 16 / 24

9. Known Runtime Note (Current Environment)

In this offline environment, Prisma engine downloads are unavailable. A local Prisma-compatible shim is used for runtime continuity and demo flow validation.

10. Definition of Done for PDF1-PRODUCT

Done when:

- All core screens exist and are navigable.
- Auth + protected routes are enforced.
- Dashboard, transactions, notes, reminders, and simulations are data-backed.
- Export and re-auth controls are present.
- Product spec is regenerated from this markdown source.
